# MOBILE DIGITAL LOCKER

## MOBILE DIGITAL LOCKER from ADDSOFT

A digital mobile locker is a virtual storage space or application on a mobile device that allows users to securely store and access digital items, such as documents, mobiles, or other files. It operates as a digital counterpart to a physical locker or safe, providing a convenient and portable way for individuals to manage and organize their digital possessions.

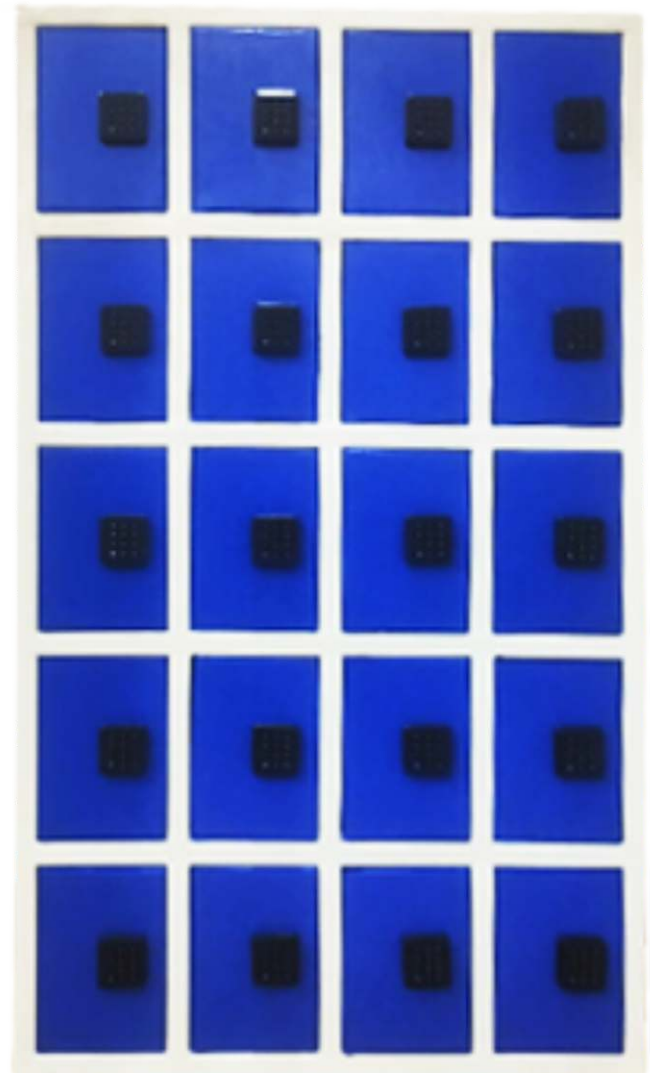

Key features of a digital mobile locker may include encryption for security, accessibility from anywhere with an internet connection, and the ability to synchronize data across multiple devices. In the context of mobile applications or services, a digital mobile locker can serve as a secure and user-friendly solution for individuals looking to manage and protect their digital assets on the go.

**Make:** ADDSOFT

**Model:** AT-DG LOCKER

### KEY FEATURES

- Security Measures
- Storage and Organization
- Sharing and Collaboration
- User-Friendly Interface
- Privacy and Data Control

**Make:** ADDSOFT

**Model:** AT-DG LOCKER

These features collectively make a mobile digital locker a secure, accessible, and organized solution for users to manage their digital assets on mobile devices.

# MOBILE DIGITAL LOCKER

Mobile charging kiosks are typically found in high-traffic areas such as airports, train stations, shopping malls, and conference centres. They are designed to accommodate one device at a time and can be locked with code for added security. Users simply connect their device to the charger and lock it in the locker until it is fully charged.

## KEY FEATURES

- Energy efficient
- Secure
- Easy Installation
- Customizable
- Live Reporting
- Compatibility

**Make:** ADDSOFT

**Model:** AT-DG LOCKER
